Assignment 1

Q1 Is Liberia Practicing the neo Classical theory or post modern theory

Q2. What is Halo effect in decision making

1. Liberia's current economic and political practices don't strictly align with either the neo-classical or post-modern theories. Instead, the country is navigating a complex landscape influenced by its history, socio-economic challenges, and international relations.
2. The Halo Effect in decision-making is a cognitive bias where a person's overall impression of someone or something influences their judgment about specific traits or characteristics.
For example, if a manager perceives an employee as highly competent based on their confidence and appearance, they might assume the employee is also hardworking and skilled—even without direct evidence.
